

STTARR - Radiation Work Approval

The STTARR Innovation Centre has a permit for the following radioisotopes and has approval to possess, transfer, store, and use them:

Radioisotopes(s)

Ac-225	I-123
Au-198	I-125
Ba-133	I-129
C-11	In-111
Co-57	Na-22
Cs-137	Pb-203
Cu-64	Tb-155
Cu-67	Tb-161
F-18	Tc-99m
Ga-67	Y-90
Ga-68	Zr-89
Hg-197	

The following selection of PET and SPECT radiotracers can be obtained from affiliates or commercial sources:

PET Radiotracers

F-18 FDG
F-18 FAZA
F-18 FCholine
F-18 DCFPyl(PSMA)
F-18 Florbetaben
F-18 Sodium Fluoride (NaF)
F-18 FLT

SPECT Radiotracers

Tc-99m pertechnetate
Tc-99m MDP
Tc-99m HMPAO
Tc-99m DTPA
Tc-99m MIBI

Disclaimer Statement: Some of the radioisotopes or radiotracers may not be available from time to time. To confirm their availability, please consult with the STTARR team (sttarr.general@uhn.ca).
